Election/Restrictions

1. This application contains claims directed to the following patentably

distinct species of the claimed invention:

a. Figure 1 - a humidity sensor comprising a moisture sensing film and

a capacitance adjusting film. This embodiment appears to be related to claims

1-5 and 8-12.

b. Figure 7 - a humidity sensor comprising a moisture sensing film and

a moisture blocking film. This embodiment appears to be related to claims 6,

7, and 12.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed

species for prosecution on the merits to which the claims shall be restricted if

no generic claim is finally held to be allowable. Currently, no claims are

generic.

Applicant is advised that a reply to this requirement must include an

identification of the species that is elected consonant with this requirement,

and a listing of all claims readable thereon, including any claims subsequently

added. An argument that a claim is allowable or that all claims are generic is

considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to

consideration of claims to additional species which are written in dependent

form or otherwise include all the limitations of an allowed generic claim as

Application/Control Number: 10/797,117

Art Unit: 2856

provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Page 3

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

## Conclusion

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David A. Rogers whose telephone number is (571) 272-2205. The examiner can normally be reached on Monday - Friday (0730 - 1600).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hezron E. Williams can be reached on (571) 272-2208. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
